

Doctoral Degree Advancement Management System

School of Informatics, Computing, and Cyber Systems

Developers: Adam Larson, Brandon Shaffer, Eddie Lipan

College of Education, Curriculum of Instruction

Sponsors: Gretchen McAllister, PhD, Michele Benedict

Purpose

Undergraduates use learning management systems (LMS) such as BBLearn or Canvas. Graduate programs become less quantifiable and tracking them with a traditional LMS becomes challenging.

Function

- Graduate students to **track their progress** through the program by uploading key documents to the application.
- Administrators can manage students, view their progress within the program, and provide feedback based on documents in the system.

Features

- Students track their progress through the graduate program with the responsibility of managing personal documents.
- Color coding of completed tasks provides clear progress
- Administrators have access to all student records and progress

Technologies

Find our team website and what we've been up to here!

Welcome to the Curriculum & Instruction Doctoral Tracker!

Challenges

- **No direct access** to NAU student accounts
- Providing **accessibility** to all students while conforming to NAU's marketing policy

The Products Future

- **Scalability**
 - Desired to be extended to other colleges within NAU
- **Connectivity**
 - Integration with ITS to make additional student information available to both students and faculty
