

Hozhoni Art Team A #17

ME 486C - 02

2/22/2017

Team Minutes Week: 6

5:30 pm to 7:30 pm

Location: Friend garage

Recorded by: Mohammad Alotaibi

5:30 pm to 7:30 pm – to build the device using Wood sheets:

We set up a meeting to build our device and we divided the parts for each member

- Ahmad cut the main board and put the hinges. Also, he did the corners.
- Madison was doing the legs for our device.
- Waleed did the half-circle in the mainboard.
- Haitham was working on the two attachment and connected them to the main board.
- Mohammad was doing the easel board.

We used the chop saw for the attachments and legs. Also, we used table saw for cutting the easel and the corner. In addition, we used sapper saw to cut the half of circle in the main board. We drilled the screws using impact drill.
